Education

ITER, Siksha 'O' Anusandhan Expected Jun 2028
Bachelor of Technology in Computer Science & Engineering (Core) (CGPA: 7.3 / 10.0) *Bhubaneswar, Odisha*

- **Relevant Coursework:** Data Structures and Algorithms (Java), Prob & Stat, Linear Algebra, Algorithm Design, OOP, Computer Organization & Architecture, Digital Logic Design, Python(Basics), Django Framework, Linux(Basics), Discrete Mathematics, Graph Theory, Macro Economics, Micro Economics

DAV Public School, UNIT-VIII Passout May 2024
12th (Percentage: 73.4%) *Bhubaneswar, Odisha*

DAV Public School, UNIT-VIII Passout May 2022
10th (Percentage: 83.4%) *Bhubaneswar, Odisha*

Projects

AI-Based Adaptive Study Planner | *React, Node.js, Google Gemini API, HTML, CSS, JavaScript, npm, Git, GitHub*

- Led the research and defined the project scope for an AI-powered study planner that generates personalized schedules based on subjects, topics, exam dates, and study constraints
- Conducted feasibility analysis of AI-assisted study planning workflows and helped design system requirements, user journeys, and core feature specifications
- Collaborated with team members during development to refine scheduling logic, document analysis workflows, and user experience requirements
- Gained hands-on exposure to React, TypeScript, API integration, prompt engineering, and modern web application architecture through active participation in the project lifecycle

1-Bit ALU Design using VHDL and Multiplexers | *VHDL, Digital Logic, K-Maps, Combinational Logic, Hardware Simulation*

- Designed & implemented a 1-bit Arithmetic Logic Unit in VHDL using two 4:1 multiplexers and combinational logic gates
- Implemented operations — XOR, OR, Addition, and Subtraction — using a 2-bit control signal
- Optimized logic using truth tables and Karnaugh Maps (K-Maps) to derive simplified Boolean expressions for output and carry/borrow bits
- Developed a testbench to verify all 16 input combinations, validating functional correctness through waveform simulation

Technical Skills

Programming Languages: Java, Python, SQL, JavaScript, HTML/CSS, VHDL
Frameworks & Libraries: React, Node.js, Django, NumPy, Matplotlib
Tools & Platforms: Git, GitHub, Linux, Jupyter Notebook, npm
Core Computer Science: Data Structures & Algorithms,OOP, Computer Organization & Architecture, Digital Logic Design, Combinational Logic Design
AI & Web Development: Gemini API Integration, Prompt Engineering
Mathematics: Probability & Statistics, Linear Algebra, Discrete Mathematics, Graph Theory, Calculus

Positions of Responsibility

Google Developer Groups (GDG), ITER SOA Sep 2025 – Present
Core Member(PR & Management) *Bhubaneswar, Odisha*

- Coordinated with senior members in planning and executing technical events, workshops, and community initiatives for the student developer community
- Managed event logistics and operational activities, ensuring smooth execution and participant engagement across multiple sessions.
- Led a team of 5 members in a collaborative project under GDG, facilitating task coordination, progress tracking, and team communication and ensured timely delivery
- Actively contributed ideas during meetings and strategic discussions; proposed an event concept that was approved and included in the roadmap for future GDG events
